DESCRIPTORS: *Solar corona, Magnetic fields, Gravity, Electric currents, Gases, Pressure, Stability, Equations, Astrophysics, Theory, *Solar flares.

A theory of the stationary support of solar filaments (prominences) by the magnetic field of field patches is proposed. Only at those places where the magnetic field is horizontal a filament can be supported. In addition conditions of stability have to be fullfilled. Some simple two-dimensional models of the kind are (Astronomy--Astrophysics, TT, v. 10, no. 4) (over)
